

## GoGetSSL For WHMCS Module

### 1. Customers notifications

Script responsible for:

- a) sending customer notifications about expiring services
- b) creating renewal invoices for services expiring within 90 days

is located in: **modules/addons/GGSSLWHMCS/cron/notifier.php** in your WHMCS main dir.

It should be added to cron tasks list and should be run once a day.

```
0 0 * * * php WHMCS_MAIN_DIR_PATH/modules/addons/GGSSLWHMCS/cron/notifier.php
```

### 2. Notification email template

Template used to send customer notifications is added automatically, when module is being activated or upgraded. In order to customize it, go to Setup → Email Templates in WHMCS admin panel and search for „GoGetSSL - Service Expiration” template.
